EDUCATION

Arizona State University, Tempe, AZ <i>Master of Science in Computer Science</i>	3.89 CGPA <i>Expected May 2027</i>
Silver Oak University, Ahmedabad, India <i>Bachelor of Technology in Computer Engineering</i>	9.05 CGPA <i>May 2025</i>

EXPERIENCE

Web Assistant <i>Arizona State University (Knowledge Enterprise)</i> - Built 15+ custom blocks across WordPress and Drupal to extend functionality for ASU enterprise applications. - Developed and optimized web pages using HTML, CSS, JavaScript, WordPress, and Drupal for ASU Knowledge Enterprise. - Implemented responsive, mobile-first interfaces with strict WCAG accessibility compliance across all delivered pages. - Debugged and resolved site issues to maintain performance and functionality for university stakeholders.	April 2026 – Present <i>Tempe, AZ, USA</i>
Student Researcher <i>Arizona State University (Prof. Hua Wei)</i> - Researching VLM geometric accuracy using novel grounding techniques like auxiliary line generation and attention blur. - Benchmarked geometry datasets with Qwen3 models on ASU SOL supercomputer for large-scale reasoning analysis. - Evaluated model performance on GeoInt benchmark to measure reasoning improvements across geometry problems.	Feb 2026 – Present <i>Tempe, AZ, USA</i>
Research Assistant <i>Arizona State University (Prof. Hyunsung Oh)</i> - Built a mental health resource platform for social workers using React, Node.js, and PostgreSQL to streamline discovery. - Engineered scalable backend services and database schemas to handle sensitive social work data with high availability. - Integrated a RAG-powered chatbot for care resource retrieval to assist social workers under high pressure.	Jan 2026 – Mar 2026 <i>Tempe, AZ, USA</i>
Full-Stack Developer Intern <i>RealList AI</i> - Delivered 15+ full-stack features using MERN stack and AWS, onboarding 1,000+ users across enterprise workflows. - Reduced response times by 50% using Redis caching to stabilize the system for over 10,000 daily transactions. - Built RAG-powered AI chatbot using Node.js enabling 24/7 intelligent property support with context-aware responses. - Engineered unified marketplace module consolidating property listings across 10+ enterprise clients.	Jan 2025 – Jun 2025 <i>Remote</i>
Software Engineer Intern <i>Caring Click</i> - Architected Next.js and Firebase platform delivering financial guidance and advisor onboarding for 500+ active users. - Integrated Razorpay payment gateway to streamline real-time transactions, reducing processing time by 30%. - Built real-time advisor-client scheduling system, reducing meeting coordination overhead for 500+ users. - Optimized AWS infrastructure achieving 99.9% uptime with fault-tolerant architecture for seamless reliability.	Mar 2024 – Aug 2024 <i>Ahmedabad, IN</i>

PROJECTS

Orbit: github.com/pateldivyesh1323/orbit - Built an AI WhatsApp copilot using FastAPI, Next.js, and MongoDB with semantic memory and Calendar/WakaTime context. - Implemented Gemini tool-calling and embeddings with OAuth and Dockerized deployment on AWS EC2.
EscalateConvo: github.com/orgs/EscalateConvo/repositories - Built a MERN-stack platform using RAG to simulate and evaluate AI agent performance against customizable personas. - Integrated ElevenLabs AI agents for real-time stress testing, improving candidate assessment accuracy by 35%.

SKILLS

Languages & Web: C++, Python, Golang, Java, TypeScript, React, Next JS, Node, Express, Tailwind, WebSockets, SSR, ShadCN UI
Databases & ORM: MongoDB, PostgreSQL, Redis, MySQL, CockroachDB, Elasticsearch, Neo4J, Firebase, Prisma ORM
AI & Machine Learning: Transformers, LLMs, RAG, LangChain, LangGraph, Hugging Face, Vector DBs, Fine-tuning, Scikit-Learn
Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, GitHub Actions, Linux, Git
